ARO Technology. Only better.

EnOcean
Sustainable IoT

Make the most of your school & university space!

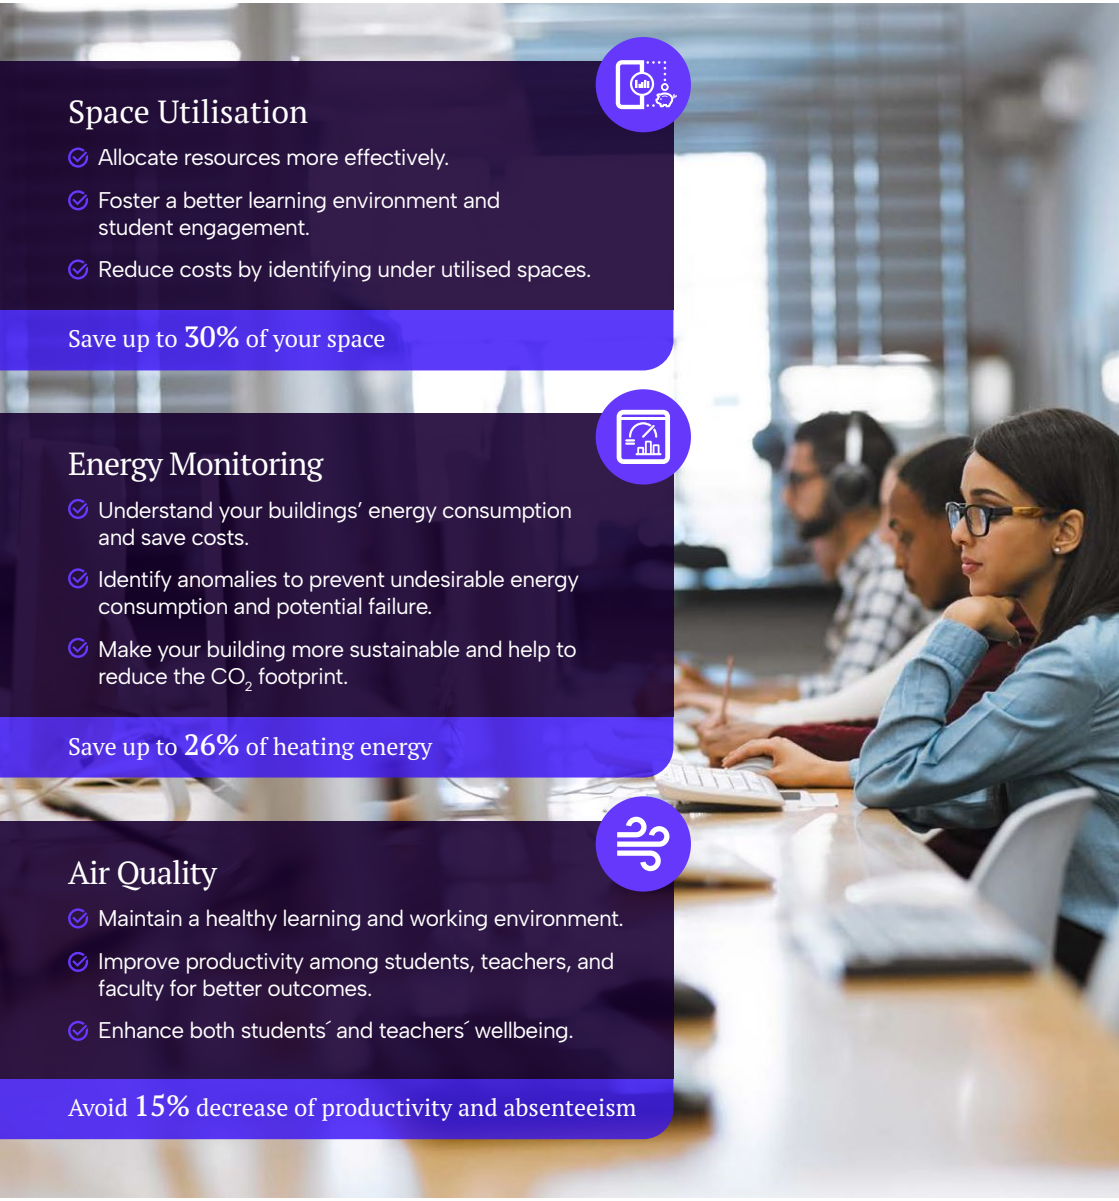

Obtain real-time data from your campus to improvestudent and faculty experiences, maintain a healthy, productive learning environment and reduce costs.

Leveraging sensor data analytics to gain actionable insights and seamlessly integrate the data in your resource planning and building systems.

Smart Education

EnOcean
Sustainable IoT

Space Utilisation

- Allocate resources more effectively.
- Foster a better learning environment and student engagement.
- Reduce costs by identifying under utilised spaces.

Save up to **30%** of your space

Energy Monitoring

- Understand your buildings' energy consumption and save costs.
- Identify anomalies to prevent undesirable energy consumption and potential failure.
- Make your building more sustainable and help to reduce the CO_2 footprint.

Save up to **26%** of heating energy

Air Quality

- Maintain a healthy learning and working environment.
- Improve productivity among students, teachers, and faculty for better outcomes.
- Enhance both students´ and teachers´ wellbeing.

Avoid **15%** decrease of productivity and absenteeism

Partnership with HPE Aruba Networking

At ARO, we're proud to bring together the power of EnOcean's energy-harvesting IoT technology with the enterprise-grade networking and security of HPE Aruba Networking. This seamless integration enables your organisation to connect EnOcean IoT sensors directly into your existing HPE Aruba Wi-Fi infrastructure—no additional gateways required.

By combining EnOcean's innovative wireless sensors with HPE Aruba's robust, secure networking capabilities, ARO helps you unlock real-time IoT insights while staying fully aligned with your IT and security policies. It's a smart, scalable way to extend your infrastructure—without adding complexity.

EnOcean
Sustainable IoT

Energy-harvesting IoT— Smarter, Greener Infrastructure with ARO and EnOcean.

At ARO, we work with innovative partners like EnOcean to deliver smart, sustainable IoT solutions. EnOcean's energy-harvesting sensors operate without batteries, cables, or maintenance—making them ideal for longterm, low-impact use.

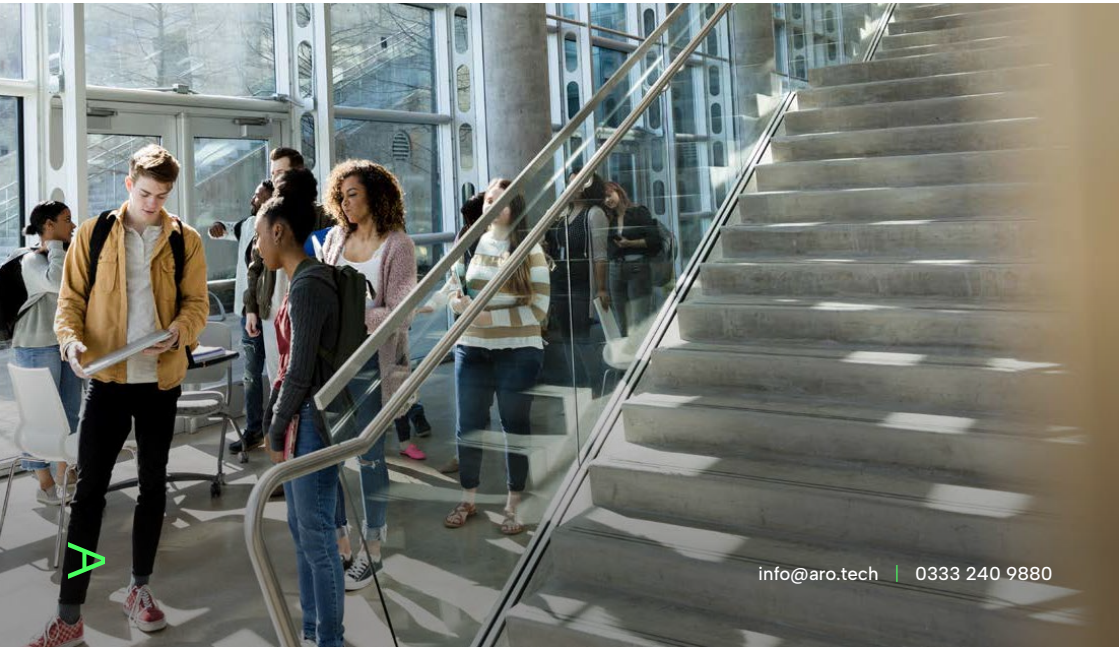

Easily integrated into existing wired or wireless networks, these solutions support a wide range of applications, from building automation and smart lighting to logistics and industrial environments, helping to reduce carbon footprint and drive.

Benefits of leveraging sensor data:

- Productive, healthy learning environments.
- Better use of school / university space.
- Reduced energy costs.
- Easier ESG reporting.
- Compliance with the General Data Protection Regulation (GDPR).
