

4 - 5 FEBRUARY 2026 AT P&J LIVE

Organised by:

Subsea Exhibition & Conference

From across the underwater industry we are seeking the brightest minds, industry experts, innovators, leaders and those with an eye on the future to present at Subsea Expo 2026.

Call for Speakers

DEADLINE: 30 September 2025

SPOTLIGHT SESSIONS

Subsea Expo is a two-day, free to attend showcase of the capability, innovation, technologies and skills that exist across the underwater industry. Running alongside the exhibition which features over 100 companies and organisations, the multi-stream conference programme provides opportunities for learning and development featuring a broad range of speakers.

The Subsea Expo programme will feature **Spotlight Sessions** running as part of the conference programme. It offers a dedicated platform for companies to showcase innovations, highlight new technologies and discuss collaborative projects.

Subsea Expo annually welcomes around 5,000 visitors, with representatives from around 44 countries, making it one of the leading events in its field.

EXPLORING GLOBAL CHALLENGES

The world continues to face complex, interconnected challenges from delivering clean, reliable energy and safeguarding subsea infrastructure, to enabling resilient global communications, combating climate change, and ensuring sustainable access to food, water, and employment for a growing population.

The subsea industry, driven by innovation, advanced technology, and cross-sector collaboration is uniquely equipped to respond. With its critical role in the expanding blue economy, it is helping to shape a more sustainable, secure, and connected future for all.

At Subsea Expo, we are providing a dedicated stream within our conference programme that will allow companies to directly shine a spotlight on technologies, innovations, ideas and collaborations that are making a difference in the subsea and underwater industries.

Each presentation within the **Spotlight Sessions** will be 12 minutes in length and form part of the hour-long sessions that will be chaired by Global Underwater Hub. This approach allows businesses to put the commercial focus of their product, service or offering at the heart of their short presentation to an engaged audience in the exhibition arena.

Subsea Expo has a tradition of welcoming presentations from companies operating right across the subsea and underwater sectors. In 2025, the event saw key industry topics debated over 13 conference sessions and featured contributions from over 90 speakers.

This is your opportunity to join the debate.

SUBMIT YOUR ABSTRACT

We are keen to hear a wide range of voices at Subsea Expo, reflecting the vibrancy, expertise, innovation and adaptability of the underwater industry. From academia conducting research and start-up companies launching innovative technologies, to established firms adapting equipment for new markets and collaborations bringing game-changing benefits to the sector.

The **Spotlight Sessions** at Subsea Expo are your chance to share your knowledge, technologies, alternative approaches, research findings and project summaries to visitors from around the world.

We are looking for abstracts on a broad range of topics, whether the industry application relates to oil and gas, offshore wind, wave and tidal energy, decommissioning, subsea pipelines and cabling, subsea inspection or aquaculture. The topics are:

- **Late life management**
- **Underwater Robotics**
- **Subsea power (inc. control & umbilicals, marine renewables, subsea batteries, grid connection)**
- **Seabed prep (inc. survey, UXO, trenching)**
- **Advanced manufacturing & engineering**
- **Circular economy in subsea operations (inc. waste reduction, extending asset life, driving innovation)**
- **MET Ocean**
- **Subsea 2035 - what does the future look like?**
- **Data & digitalisation**
- **Diving systems and operations**

Further information is available on the abstract submission form.
