DEEPWATER WIND

Deepwater wind is emerging as a pivotal opportunity in the offshore energy transition, enabling access to sites beyond the reach of traditional fixed-bottom wind while offering a compelling alternative to floating solutions. However, unlocking its potential requires a clear understanding of the technical, operational and commercial challenges unique to deeper water environments.

This conference brings together the expertise needed to address those challenges, exploring the critical role of subsea engineering, geotechnics, installation methodologies, marine operations and enabling technologies in making deepwater fixed wind commercially viable. Attendees will gain valuable insights into the latest innovations, practical strategies and collaborative pathways that can reduce project risk, improve development certainty and accelerate deployment at scale.

TICKETS

£250 +VAT FOR GUH MEMBERS

£350 +VAT FOR NON MEMBERS
