MOOREAST

Moorings Seminar Series: Anchors & Survey 2026

Wednesday July 8th 2026

Global Underwater Hub, Westhill

Global Underwater Hub
is the leading trade and
industry development
body for the UK's
underwater sectors.

Owned and governed by industry, Global Underwater Hub represents, promotes and supports all sectors of the underwater industry. As the UK's underwater industry organisation, we support our member companies by enabling access to market opportunities, expertise, contacts and specialist support to accelerate market growth and build value.

Anchors & Surveys Seminar 2026

Wednesday July 8th 2026

Join Global Underwater Hub on Wednesday, 8 July 2026 for the first in a new series of focused moorings seminars designed to bring industry together around key challenges and opportunities.

The one-day event, sponsored by **Mooreast**, will take place in the event studio at Global Underwater Hub in Westhill, running from 8.30am until 4pm.

Open Discussions & Roundtables

This is not a traditional seminar or conference. It's designed as a working session, giving attendees the opportunity to discuss issues openly, share experience and spend time with others working across the sector.

Bringing together developers, contractors and the wider supply chain, the Anchors & Survey seminar will focus on practical discussion and collaboration around current technical and commercial challenges facing the industry.

The day will feature short scene-setting inputs from industry before moving into a facilitated workshop-style format. The focus is on participation rather than presentations, with plenty of time built in for discussion and networking.

Networking Opportunities

Delegates will also have the opportunity to book one-to-one meeting slots with attending developers, workshop leaders, members and sponsors, creating additional opportunities for focused conversations and business engagement.

With limited numbers and a small-group format, the seminar is designed to encourage open conversation, peer-to-peer exchange and stronger networking opportunities than are often possible at larger conference events.

Anchors & Survey Seminar 2026

Supporting partners

MOOREAST

Mooreast UK

Seminar Sponsor

Mooreast UK Ltd is part of Mooreast Holdings which is a Singapore-based, total mooring solutions specialist serving the offshore renewable energy, oil and gas, and marine industries. Mooreast possess the ability to design, engineer and fabricate a range of mooring system products specialising in anchors. From their shipyard in Singapore they also can offer rigging, heavy lifting, and yard services (repairs/testing) for a range of vessels and jack-ups.

Mooreast UK facilitates the European market leveraging its strength in design engineering while also boosting the manufacturing capabilities of Mooreast Singapore to assist with a wide range of mooring system projects from early stage design through to manufacture and delivery.

Anchors & Survey Seminar 2026

Wednesday July 8th 2026

Conference Programme

08:30 – 09:00	Registration, coffee and networking
09:00 – 09:15	Welcome – Global Underwater Hub
09:15 – 09:30	Market Intel – Global Underwater Hub
09:30 – 10:30	Session 1 – Discussion supported by DNV
10:30 – 11:00	Coffee & Networking
11:00 – 11:45	Session 2 – Discussion supported by Xodus
11:45 – 12:30	Session 3 – Discussion supported by Acteon, UTEC & 2H
12:30 – 13:30	Lunch & Networking
13:30 – 14:30	Session 4 – Discussion supported by Mooreast & Subsea Micropiles
14:30 – 14:45	Closing Remarks – Global Underwater Hub
14:45 – 16:45	1:1 Networking Session with Mooreast UK Subsea Micropiles Acteon Xodus DNV
16:45	Event Close

Anchor & Surveys Seminar 2026

Wednesday 8th July 2026

Company Profile

DNV

We are the independent expert in assurance and risk management. Driven by our purpose, to safeguard life, property, and the environment, we empower our customers and their stakeholders with facts and reliable insights so that critical decisions can be made with confidence. As a trusted voice for many of the world's most successful organizations, we use our knowledge to advance safety and performance, set industry benchmarks, and inspire and invent solutions to tackle global transformations.

We are the world's leading classification society and a recognized advisor for the maritime industry. We deliver world-renowned testing, certification and technical advisory services to the energy value chain including renewables, oil and gas, and energy management. We are one of the world's leading certification bodies, helping businesses assure the performance of their organizations, products, people, facilities and supply chains.

We are also a world-leading provider of digital solutions for managing risk and improving safety and asset performance for ships, pipelines, processing plants, offshore structures, electric grids, smart cities and more. Our open industry assurance platform Veracity, cyber security and software solutions support business-critical activities across many industries, including maritime, energy and healthcare.

Anchor & Surveys Seminar 2026

Wednesday 8th July 2026

Company Profile

Xodus Group

As a global energy consultancy, we unite our unique and diverse people to share knowledge, innovate and inspire change within the energy industry. We provide support across the energy spectrum, from advisory services to supply chain advice, including all engineering and environmental expertise in between.

We strive to ensure global energy supply is maintained as we work together to realise a net zero world. As we progress through the energy transition, Xodus continues to deliver high quality, fit for purpose solutions to the industry, no matter the energy challenge.

The key sectors we provide energy services includes oil and gas, offshore wind, carbon capture, utilisation and storage, cables and interconnectors, hydrogen and marine energy. As an active participant of the United Nations Global Compact (UNGC), we champion responsibility across everything we do, and promote others do the same. We believe, together, we will deliver a responsible energy future.

Anchor & Surveys Seminar 2026

Wednesday 8th July 2026

Company Profile

Acteon

From seabed to surface, Acteon develops solutions to the energy industry's most complex problems. We harness data, engineering knowledge and operational expertise to efficiently design, install, maintain, extend the life of, and decommission offshore energy assets to ensure they deliver maximum economic value.

Using the latest technology, we gather and analyse hard-to-reach data in the most challenging environments. We partner with customers to apply it to their specific needs and challenges and devise tailored plans to help them safely and responsibly accelerate projects and reduce the total cost of operations. This allows our customers to focus on enhancing their core operations, growing sustainably and profitably and, ultimately, delivering the energy the world needs.

Anchor & Surveys Seminar 2026

Wednesday 8th July 2026

Company Profile

Subsea Micropiles

Subsea Micropiles (SM) is adapting terrestrial micropiling technology to the offshore construction sector for high-performance seabed foundations and anchors, supporting a wide range of applications to include increasingly larger offshore wind turbines.

The adaptation of micropiling technology to the offshore sector poses a highly beneficial disruption to an industry where the existing supply chain infrastructure is unsuitable for commercial scale wind farms.

Using smaller, more readily available vessels, remote seabed drilling systems and an offshore assembly line approach, large construction jobs can be more reliably completed at half the cost, with reduced vessel requirements, more efficient seabed drilling systems, minimal environmental impact and high local content.

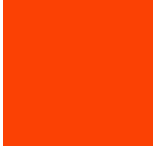

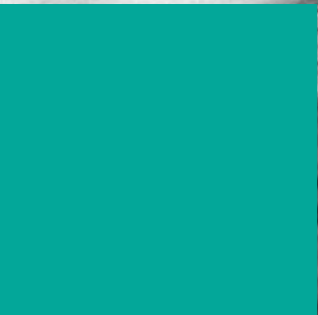

Led and governed by industry, Global Underwater Hub is helping to transform the UK's underwater industry into one of the largest and fastest-growing industries in the country, accelerating the drive to net-zero and creating high value jobs and exports.

With offices in Aberdeen, Newcastle and Bristol, Global Underwater Hub is well placed to support its members across the United Kingdom.
